

About Us

The Topliss family company has been designing and making shower mixing valves in Nelson, New Zealand since 1956. Those valves produced way back in the 1950's can still be reconditioned at the Nelson factory. The latest European ceramic seal technology is available in the [TB-S40 valve](#), giving long life and excellent flow control. Topliss [standard mixers](#) and [shower heads](#) ensure a better shower even with very low pressure water systems.

The company is a manufacturer with a precision machine shop carrying out a wide range of [engineering services](#) – providing contract machining services while also manufacturing our own [products](#) such as [shower mixing valves](#). All manner of tasks from [repair work](#) to [design](#) and [manufacture](#) are offered. We have tools ranging from mills, drills, lathes, presses, welders and grinders through to the most state of the art [CNC](#) machinery.
